

Making AI Work for Retail

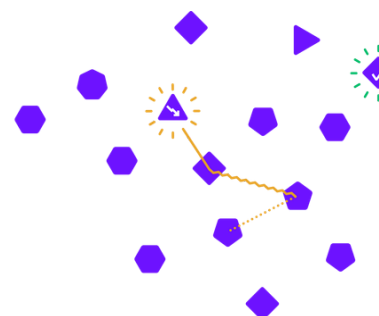

Accelerate Your Road Map to AI Adoption

We offer a suite of AI learning and development opportunities that retail associations can bring to their members, giving them the knowledge, confidence, and practical skills to put AI to work in their businesses.

These sessions are designed to demystify business and system AI, highlight where AI can drive value in retail operations, and equip members with clear, actionable next steps.

From AI opportunity sessions to intelligent breakfasts and our flagship AI Adoption Accelerator, each module provides structured, real world learning that helps members understand their data, uncover high value opportunities, and build capability for the future.

Partnering with us enables you to deliver meaningful AI education to your membership, supporting them as they take their first steps towards adopting AI with clarity and confidence.

Here's What We Offer:

Intelligent Breakfasts

- In-person breakfast gatherings hosted in collaboration with partners
- Informal but content-rich networking experiences
- Focus on Peer-to-Peer discussions
- Get direct access to Galvia experts and insights

How they work:

- Hosted monthly/quarterly in partnership with associations
- Mix of key insights, peer discussions, and shared stories with a range of guest speakers
- Focus on practical industry-specific AI journeys, not just theory

AI Opportunity Sessions

- 1-1 hands-on sessions guided by Galvia's AI and data experts
- Participants can bring their own ideas or simply an open mind
- Retailers gain a confident understanding of what AI can do for their business

How they work:

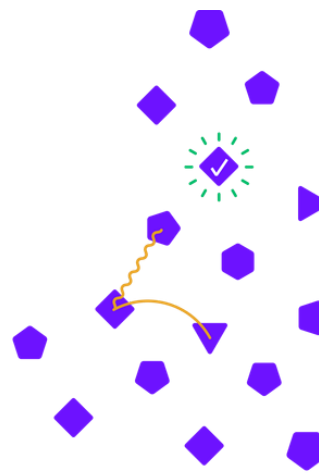

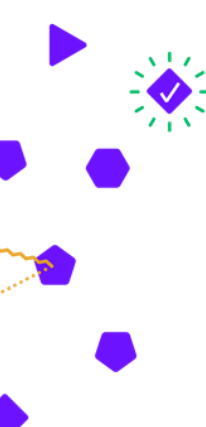

- Explore your key priorities such as sales, stock optimisation, or customer retention
- Work through practical AI use cases & prioritise by business impact
- Review what data you already have and how it could be used

AI Adoption Accelerators

- An exclusive 3-week programme designed to demystify business and system AI.
- Participants get a clear direction on how AI can support business strategy and unlock real commercial value.
- Explore AI together with a peer network of retailers

How they work:

- Interactive workshops delivered Galvia's AI specialists
- Flexible format: in-person kick-off session followed by online one-to-one data deep dives
- Member specific content, practical demos, and real-world examples of AI in action

Galvia AI Adoption Accelerator

- An exclusive three-week accelerator designed to demystify business and system AI, and reveal how your own data can be used to unlock commercial value.
- Through a structured process, you will identify and refine a high impact AI opportunity statement for your business, validate it against your data under NDA, and leave with a clear, evidence based starting point for your AI roadmap.

Week 1: In-Person Group Session (Half Day)

- Introduction to applications of AI in retail
- Legal considerations on using AI in your business
- Case study session demonstrating commercial value
- Workshop: Draft an AI Opportunity for your business

Week 2: Individual Online Session (2hrs)

- One to one refinement of your AI Opportunity Statement
- Clarification of objectives, value, and success measures
- Review of your business systems and the data they hold
- Feasibility discussion to ensure the opportunity is well framed and actionable

Week 3: Individual Online Session (2hrs)

- Business shares sample data under NDA
- Galvia Technical team will review and then meet with the retailer to present back findings from the data set
- Assessment of data readiness against the finalised AI Opportunity Statement

Hear from Those Who've Seen the Results

"It was an excellent experience. I would recommend this program to anyone looking to explore AI solutions tailored to their specific needs."

Conor Fitzsimons, Woodies DIY

Woodie's

"The Accelerator made us realise we weren't even scratching the surface of our data. The scale of it, and the missed opportunities, really hit home."

Eveanna Ryan, Connacht Hospitality Group

"What I got most from the Accelerator was understanding that AI is a journey – not a quick fix. The real value comes when you use it to uncover deep patterns and insights hidden in your data. But to get there, your data has to be right."

Ian McSweeney, Windward Group

About Galvia

Galvia is an AI-powered platform that integrates data from multiple sources to deliver a single, real-time view of your business, along with insights, predictions, and intelligent prompts to help businesses make faster, smarter decisions.
